**PROFIBUS cable drag chain capable**

### Function

The **PROFIBUS cable drag chain capable** has a very high abrasive resistance accompanied by an almost unlimited oil resistance. The data transmission reliability is guaranteed by the special overall braided screen.

### Instructions for use

The PROFIBUS Line drag chain capable meets highest demands when it comes to laying. The extremely high bending resistance of both the conductor material and braided screen provide for optimal and reliable use in energy chains. Its resistance to oils, fats and coolants makes this line type also ideal for permanent installation in machine tool workshops.
