Topology plan software TOPOCAD

Function

CAD software for documentation of automated systems

TOPOCAD is used to create topology plans on the computer. A comprehensive macrolibrary, for PROFIBUS components for example, allows fast working. Even unexperienced users will be able to create topology plans after a short period of familiarization. On a clearly arranged user interface the required components are put on the circuit diagram by Drag & Drop. Thanks to a freely definable grid the individual elements can be easily placed and wired. Components can be combined to form groups.

Operating systems

 Windows 98, Windows ME, Windows NT, Windows 2000, Windows XP, Windows Vista, Windows 7, Windows 8
